

Interiors Technology

Enhancing the passenger experience

A smarter, streamlined solution for train carriage interiors.

Our new interiors technology offering provides a fully integrated, performance enhancing solution for new and overhauled passenger-facing components - delivered lineside, on time and tailored to your fleet.

We are bringing together all the disparate elements of train interior refurbishment into a single, structured, and customer-specific service, delivering a solution that saves time, reduces cost and improves reliability.

From design to delivery, Unipart's solution supports every step of your refurbishment journey, improving passenger experience and operational efficiency across the rail network.

A complete interior overhaul service

Our modular approach is adaptable to fleet size, branding and lifecycle stage, covering:

Seating Systems: Lighter, lower-cost, and easier-to-maintain seat shells, foams and fabrics.

Chair Trays: Innovative, durable flip-up tray designs.

3-piece carpets: Precisely manufactured for consistent quality and fit.

Grab Handles: Reverse-engineered or newly developed to meet modern requirements.

Logistics & Scheduling: Coordinated manufacture and upgrade planning.

Toilet Components: Full range of components and new fixing designs.

A smart approach to rail sanitary systems

Unipart has partnered with Trainvac Group - one of Europe's leading providers of rail sanitary systems - to deliver a new benchmark in toilet spares and solutions for the UK rail industry.

We provide a wide range of high-quality, performance-enhancing sanitary components designed to reduce downtime, boost efficiency, and support long-term sustainability goals.
